Internet Magazine

Bug fixes. Your version of Windows 10 will update automatically through Windows Update, probably in May or June, 2020. (Tap the Tablet mode button, for example, to toggle Tablet mode on and off.) Mouse equivalent: Click the taskbar's Action center icon, which resembles a thought balloon used by cartoon characters. The onscreen image expands or shrinks accordingly. Mouse and keyboard equivalent: Hold down the control key on the keyboard while using the mouse wheel to grow or shrink an item on the screen. **Rotate to turn:** Hold down two fingers onscreen and rotate them, just as if you were moving a sheet of paper on your desktop. The updates arrive automatically through the Microsoft Store app. Microsoft updates Windows 10 twice a year, and this book is up-to-date with the changes Microsoft added in the Spring of 2020. In a welcome change, the Settings app's Privacy section now includes a Diagnostic & Feedback section. Mouse equivalent: Right-click a blank portion of the app to see the apps commands. `"http://b(*) + \".scorecardresearch.com/beacon.js\"":el.parentNode.insertBefore(s, el);):`
